Dr Ron Hill MBE

Inspired by comic book hero Alf Tupper, Ron became a real life tough of the track and the roads during the Sixties and early Seventies.

He won European, Commonwealth and Boston marathon titles and his PB of 2:09:28 has stood the test of time. A genuine running machine; Ron has also not missed a single days running since December 1964.

Add to this Ron's PhD in Textile Chemistry and you can see why even at 72; Dr Ron still plays a vital role in the design and development of our entire sock range.

17L BACKPACK

34010-027
34015-028

Black, Royal Blue Trim
Black, Fluo Pink Trim

Large main storage pocket suitable for carrying kit and footwear.
Internal security pocket.
Smaller front pocket.
2 wing pockets (1 mesh) with key fob and identity medical card.
Water resistant, high visibility rain cover (removable) with own storage pocket.

Extremely absorbent terry cloth for efficient sweat absorption

GLOSSARY OF TERMS

ANATOMICAL

Left and right socks with cushioning exactly where required for each foot.

ANTIMICROBIAL

Inhibits bacterial growth, maintaining the biological balance of the skin and reducing unpleasant odours.

ARCH GRIP

Elasticated section holding the sock firm against the foot to prevent movement that can lead to blisters as well as providing support to the arch.

CUSHIONED

Terry loop construction helping to provide protection, shock absorption and added comfort.

FLAT TOE SEAM/ HAND LINKED TOE SEAM

Special construction to help prevent blisters that can be caused with socks that have overlapped seams.

GRADUATED COMPRESSION

Progressive reduction in tightness and compression which goes up the sock leg producing a gentle, upward squeezing effect encouraging blood flow.

PADDED

Terry loop construction forming padding which provides cushioning for added shock absorption.

THERMODYNAMIC

Helps to regulate temperature, keeping the feet cooler in warmer conditions and warmer in cool conditions.

VENT FLEX

Special construction for additional ventilation and flexibility on front of ankle.

WICKING

Process of moving moisture from the skin to the outside of the fabric/sock, to help keep the skin dry.

'Y' HEEL/ 'W' HEEL

Anatomical, shaped heel for better fit.
